# THE QUEST FOR OLDEST ICE IN ANTARCTICA

**Barbara Stenni**

Ca' Foscari University of Venice;

Barbara Stenni is professor of Geochemistry at Ca' Foscari University of Venice in Italy. She has more than 20 year-experience in the application of O and H isotopes in polar science and paleoclimatology and has participated in several successful deep drilling projects in Antarctica (EPICA, TALDICE) and leading paleoclimatology projects focusing on the Holocene (ESF-HOLOCLIP) and the last 2000 years (PAGES Antarctica2k). Now she is involved in the EU H2020 project "Beyond EPICA Oldest Ice Core: 1.5 Myr of greenhouse gas-climate feedbacks" and in the ITN H2020 DEEPICE.
